

Dashboard Design Task

Data Analyst Internship – Elevate Labs
Prepared By: Anjana P

Dataset Overview

Dataset Description

This dataset is used to analyze sales performance and business trends.

Dataset Fields:

- Month
- Sales
- Profit
- Category

Objective:

To track sales performance, profit generation, and category-wise business performance using a dashboard.

Dashboard Data

[illegible]

Conclusion

The dashboard provides a clear overview of sales performance using key metrics such as Total Sales, Total Profit, Total Orders, and Average Profit.

Category-wise analysis indicates that Electronics generated the highest sales. The dashboard helps organizations monitor performance, identify trends, and support data-driven decision-making.
